

June 11, 2013

{Sent to each member of the House individually}

Dear :

The undersigned organizations applaud the House Committee on Agriculture for expeditiously moving forward on a five year farm bill.

The *Federal Agriculture Reform and Risk Management (FARRM) Act of 2013* (H.R. 1947) achieves spending cuts that reduce the Federal budget deficit, saving taxpayers \$40 billion, including \$6 billion through sequestration. It also repeals or consolidates more than 100 programs administered by the U.S. Department of Agriculture, including Direct Payments to crop producers. Without passage of FARRM, no budget savings will be achieved beyond sequestration.

The farm bill promotes an economically healthy U.S. agriculture sector. Its policies serve a variety of purposes including: meeting the food, fuel and fiber needs of consumers worldwide; providing a farm and natural resource safety net; improving our balance of trade through trade promotion programs; promoting rural development; and creating needed jobs here at home.

We stand united in our strong support for a new five-year bill and commend the House Committee on Agriculture for advancing a bill for timely action by the full House. Failure to pass a five-year farm bill before the end of September would mean continued uncertainty for farmers, ranchers and their rural communities; it would also mean that American taxpayer would see none of the budget savings achieved.

We look forward to working with you towards our common goal of passing a five year farm bill.

Sincerely,
